

No hype, just facts

As an evidence-based research organization, ECRI Institute offers journalists refreshingly hype-free perspectives on patient safety and the effectiveness of medical devices, drugs, and procedures.

During the past year, our thought leaders and subject matter experts have examined some of the hottest issues plaguing the industry including:

- Cybersecurity
- Patient Identification
- Patient Monitoring
- Robotic Surgery
- Opioids
- Consumer Baby Monitors
- Health IT Safety
- UV Disinfection
- Imaging
- Bulimia Nervosa
- Genetic Testing
- Costs of Medical Devices and Supplies

You have questions. We'll give you the unbiased perspective your news coverage demands.
